

# Use Our Tax Credit Expertise to Make Money as You Hire

The federal government has created a number of programs to help individuals who have received government assistance find employment.

One in five new hires can qualify your business for tax credits worth up to \$9,600 dollars. neonCredits identifies individuals that are tax credit eligible and automatically processes these opportunities for you.

For example, a restaurant with 500 employees that experiences 80% turnover would have a potential tax credit opportunity of \$116,160.00

Let neonCredits find, track and process these credits allowing for money to be put back into your business' bottom line. Our in-depth processing software technology ensures you receive every tax credit you deserve from the following programs:

- Federal Credits
- Work Opportunity Tax Credit (WOTC)
- Employee FICA Tip Credits
- Geographic Based Credits
- Disaster Relief Tax Credit
- Indian Employment Credit
- Research and Development Credit
- Cost Segregation
- State Tax and Incentive Credits (Over 3,000 types)

A five-year extension of the WOTC and Vow to Hire Heroes Act became law in December 2015. Learn how your neon system can help you make your business more profitable today.
